

9 key questions to ask when you're evaluating ERP solutions

# A checklist for finance leaders

Finance doesn't look much like finance anymore. Sure, you're handling all the traditional duties of the job, but as business continues to change, so do your roles and responsibilities.

This is good. This is an opportunity. But without a modern cloud technology stack to help you step up, you're left trying to future-proof finance with outdated tools. In fact, **nearly two-thirds of finance leaders say their current ERP or financial system\***:

Will not scale to support growth

Is not cloud-supported

Is not able to aggregate data for reporting

Is no longer maintained by the vendor

To get the help you need, look for ERP solutions that:

Find an ERP system that helps finance work smarter, faster, and more accurately, so they can spend more time on strategy.

## SIMPLIFY WORK

1. Will this ERP solution give us a single source of financial truth, eliminating data silos and data stored in multiple places?
2. Does it help us access real-time financial insights without having to wait until the closing process is over?
3. Can it effectively manage cashflow to fund the business and support future growth?

## ACCELERATE GROWTH

4. Will this ERP system adopt and accelerate best practices – including standard finance and industry-specific processes?
5. Can it help us enter new markets, supporting compliance with regional standards, business practices, and languages?
6. Will it be easier to add acquisitions, divest entities, and manage multi-entity accounting requirements?

Get an ERP solution that helps finance grow the business through best practices and easier entry into new markets.

Find an ERP solution that helps finance steer the business, scale up processes, and meet new requirements as the business evolves.

## SECURE SUCCESS

7. Does the solution perform detailed financial analysis and create plans we can share across the company?
8. Will it help us scale financial processes as we become a more complex organization?
9. Does it meet future needs without investing new platforms or vendors?
